

At a glance

Transform your Mobile Device into a Baby Monitor

Whether you're at home or away with work, you can conveniently watch over your baby on your smartphone, tablet or computer

Full-featured yet Simple to Use

The free mobile app gives you effortless access to advanced features like 2-way audio², notifications, lullabies, snapshots and video recording, and more

Secure and Safe

Secure wireless connection and remote access prevents unauthorised access, allowing you to securely connect to what matters most

Perfect at Home or Away

Mount the camera in the nursery at home or take it with you when going on a family trip; it's easy to keep an eye on your child no matter where you go

Key Benefit

The EyeOn[™] Baby Monitor Junior allows you to securely and easily monitor your baby whilst you are at home or away. It works seamlessly with your existing wireless network and smartphone/tablet, and is packed with features to help you watch over your child.

DCS-800L

EyeOn[™] Baby Monitor Junior

Overview

Keep an eye on your little one with the EyeOn[™] Baby Monitor Junior. This portable camera transforms your mobile device into a versatile, yet easy to use baby monitor. Connect to the camera wirelessly at home or through the Internet when you are at work, so you can check on your infant no matter where you are. It's packed with features to help you care for your child, including night vision as well as motion and sound monitoring. It even has 2-way audio² and can play gentle lullabies to help ease your baby to sleep! Unlike traditional baby monitors, the EyeOn[™] Baby Monitor Junior works seamlessly with your existing wireless network and smartphone. This means you will have zero interference as well as the ability to use multiple smartphones/tablets/computers as parent units. High quality image and night vision allows you to see your child clearly whatever the lighting condition.

Who is likely to buy it?

- Parents looking to:
 - Monitor their baby through their smartphone/tablet without having to carry around a parent unit
 - Be alerted when their baby needs attention
 - Securely see and talk to their baby wherever they are
 - Take snapshots and videos of their baby
 - Monitor and view their baby in any light condition, even in complete darkness
- Grandparents who want to
 - Stay in touch with their grandchildren
- Friends or relatives looking to buy a useful gift for new parents

Why would they buy it?

- High quality image with night vision allows parents to see clearly whatever the lighting condition.
- Unlike traditional baby monitors, the EyeOn[™] Baby Monitor Junior works with their existing wireless network, eliminating potential interference, giving you uninterrupted, clearer images and sound.
- Both parents can monitor the baby through their separate smartphones/tablets without having to buy additional parent units. Add additional parent units by simply installing the free mydlink[™] Baby Monitor app onto an existing smartphone/tablet.
- mydlink[™]-enabled provides secure remote live view and playback from wherever they are.
- Sound and motion alert when their baby needs attention
- Record precious moments directly onto a smartphone/tablet
- Use at home or when they are out and about. Can be used without mains power by simply connecting to a USB battery¹.

Versus the competition

Compared to competition, D-Link's EyeOn[™] Baby Monitor Junior provides a baby monitoring solution that's simple to set up, secure and easy to use. It's packed with features to help you care for your child. It also includes recording functions that ensure that you do not miss a precious moment. Free remote live view allows you to securely see and even talk to your baby wherever you are.

New Product Alert
